## CybrSafe Digital Contracts

CybrSafe digital contracts offer parents and schools a way to establish a common understanding about how to use digital devices in a safe and productive way. By initiating conversations between parents, students and their school, online behavioural issues and misuse of technology can be avoided and an open and ongoing dialogue established. By using a CybrSafe contract, students can use the technology they want to but parents and schools can be assured that they are CybrSafe.

*Why wait for a problem to arise when you can avoid it?*

### Available Features

CybrSafe digital contracts are fully customisable. Questions are set by the school and can include multiple question types such as check boxes, text fields, drop-down menus and more. Conditional logic allows parents to only be asked questions that are relevant to them. Parents can save their form and return to it before submitting. Forms can be branded with your school's logo and colours. A nominated member of the school can receive a copy of each student's contract.

Your contract can be presented to parents by the dynamic CybrSafe team in a customised launch presentation.

For more information on features and pricing, visit –

### Testimonial

*“As a direct result of the education offered to our parents and students [by CybrSafe] we have had minimal infractions from our primary students regarding on-line behaviour and misuse of digital technology. A common language between home and school has been established and as a result expectations for correct usage of technology have been clearly articulated from the start”*

- Karen Friede, Head of Primary, Bialik College, Melbourne, Australia

### CybrSafe is looking for pilot schools

At CybrSafe we strive to continually improve our products and services with the ultimate goal of CybrSafe children, schools and communities.

CybrSafe is currently seeking a small number of schools to deploy a CybrSafe Digital Devices Contract (Elite features) for free. In return for a testimonial, feedback and being listed on the CybrSafe website, you will receive a fully customised CybrSafe contract, deployed to an entire year level of your school. In addition, CybrSafe will conduct a bespoke launch presentation to your parents and students for half price\*!

To be considered as a pilot school, please fill out the application form on the CybrSafe website by 30 September 2018: <https://cybrsafe.com.au/cybrsafe-digital-contracts-trial-call-pilot-schools/>.

Successful schools will be notified via email by 12 October 2018. Please note that schools selected must deploy their CybrSafe contract within the 2019 academic year.

*\*1/2 price launch presentation fee valid for schools located within 50km of the Melbourne CBD.*
